Please read this user manual first!

Dear Valued Customer,

Thank you for preferring this Defy appliance. We hope that you get the best results from your appliance which has been manufactured with high quality and state-of-the-art technology. For this reason, please read this entire user manual and all other accompanying documents carefully before using the appliance and keep it as a reference for future use. If you handover the appliance to someone else, give the user manual as well. Follow the instructions by paying attention to all the information and warnings in the user manual.

Remember that this user manual may also apply to other models. Differences between models are explicitly described in the manual.

Meanings of the Symbols

Following symbols are used in various sections of this user manual:

	Important information and useful hints about usage.
	WARNING: Warnings against dangerous situations concerning the security of life and property.
	WARNING: Warning for danger of fire.
	WARNING: Warning for electric shock.

1 Important safety and environmental instructions

1.1 General Safety

Important Safety Instructions Read Carefully And Keep For Future Reference This section contains safety instructions that will help protect from risk of fire, electric shock, exposure to leak microwave energy, personal injury or property damage. Failure to follow these instructions shall void any warranty.

- Defy products comply with the applicable safety standards; therefore, in case of any damage on the appliance or power cable, it should be repaired or replaced by the dealer, service center or a specialist and authorized service alike to avoid any danger. Faulty or unqualified repair work may be dangerous and cause risk to the user.
- This appliance is intended to be used in household and similar applications such as:
 - Staff kitchen areas in shops, offices and other working environments;
 - Farm houses
 - By clients in hotels, and other residential type environments;
 - Bed and Breakfast type environments.
- Operate the appliance for its intended purpose only as described in this manual.
- The manufacturer cannot be held liable for damages resulting from improper installation or misuse of the product.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge unless they have been given supervision or instruction

1 Important safety and environmental instructions

concerning the use of the appliance by a person responsible for their safety.

- Children should be supervised to ensure that they do not play with the appliance.
- The minimum distance between the supporting surface for the cooking vessels on the hob and the lowest part of your product must be at least 65 cm.
- If the instructions for installation for the gas hob specify a greater distance, this has to be taken into account.
- Make sure that your mains power supply complies with the information supplied on the rating plate of the appliance.
- Never use the appliance if the power cable or the appliance itself is damaged.

- Prevent damage to the power cable by not squeezing, bending, or rubbing it on sharp edges. Keep the power cable away from hot surfaces and naked flame.
- Use the appliance with a grounded outlet only.

WARNING: Do not connect the appliance to the mains until the installation is fully complete.

- Place the appliance in a way so that the plug is always accessible.
- Do not touch the lamps if they have operated for a long time. They can burn your hands since they will be hot.
- Follow the regulations set out by competent authorities on discharge of the exhaust air (this warning is not applicable for use without flue).
- Operate your appliance after putting a pot, pan

1 Important safety and environmental instructions

etc. on the hob. Otherwise, high heat may cause deformation in some parts of your product.

- Turn off the hob before taking the pot, pan etc. from it.
- Do not leave hot on the hob. Pans with hot may cause self combustion.
- Pay attention to your curtains and covers since may catch fire while cooking food such as fries.
- Grease filter must be cleaned at least monthly. Carbon filter must be replaced at least every 3 months.
- Product shall be cleaned accordance with user manual. If cleaning was not carried out in accordance with user manual, there may be fire risk.
- Do not use non-fire-resistant filtering materials instead of the current filter.
- Only use the original parts or parts recommended by the manufacturer.
- Do not operate the product without the filter and do not remove the filters while the product is running.
- In the event of be started any flame, de-energize your product and cooking appliances.
- In the event of be started any flame, cover the flame and never use water to extinguish.
- Unplug the appliance before each cleaning and when the appliance is not in use.
- The negative pressure in the environment should not exceed 4 Pa (4x10 bar) while the hood for electric hob and appliances running on another type of energy but electricity operate simultaneously.
- In the environment where the appliance is being used, the exhaust of de-

1 Important safety and environmental instructions

vices running on fuel or gas, such as room heater must be absolutely isolated or device must be hermetical type.

- When connecting the flue, use pipes with a diameter of 120 or 150 mm. Pipe connection must be as short as possible and have as few elbows as possible.

Danger of choking! Keep all the packaging materials away from children.

CAUTION: Accessible parts may become hot when used with cooking appliances.

- The product outlet must not be connected to air channels that include other smoke.
- The ventilation in the room may be insufficient when the hood for electric hob is used simultaneously with the devices operating on gas or other fuels (this may not apply to appliances that only discharge

the air back into the room).

- Objects placed on the product may fall. Do not place any objects on the product.
- Do not flambe under the your product.

WARNING: Before installing the Hood, remove the protective films.

- Never leave high naked flames under the hood when it is in operation
- Deep fat fryers must be continuously monitored during use: overheated can burst into flames.

1 Important safety and environmental instructions

1.2 Compliance with the WEEE Directive and Disposing of the Waste Product:

This product complies with EU WEEE Directive (2012/19/EU). This product bears a classification symbol for waste electrical and electronic equipment (WEEE).

This symbol indicates that this product shall not be disposed with other household wastes at the end of its service life. Used device must be returned to official collection point for recycling of electrical and electronic devices. To find these collection systems please contact to your local authorities or retailer where the product was purchased. Each household performs important role in recovering and recycling of old appliance. Appropriate disposal of used appliance helps prevent potential negative consequences for the environment and human health.

1.3 Compliance with RoHS Directive

The product you have purchased complies with EU RoHS Directive (2011/65/EU). It does not contain harmful and prohibited materials specified in the Directive.

1.4 Package information

Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection points designated by the local authorities.

3 Using the appliance

3.1 Controlling the appliance

Lamp button		To turn on the product lamp put the switch in lamp position. The slider set should be in pulled position in order to turn on the lamp.
1st and 2nd speed switch.		Put the switch in down position to operate the product in the 1st speed and in up position to operate in the 2nd speed. To turn it off, set it to "0" position.
3. Speed switch		Put the switch in down position to operate the product in the 3rd speed. To turn it off, set it to "0" position.

3.2 Energy efficient usage

- When operating the hood, adjust the speed level according to the odour and vapour intensity in order to prevent unnecessary power consumption.
- Use low speeds in normal conditions (1–2), and high speed (3) when smell and vapours are intensified.
- Lamps on the hood are intended for illuminating the cooking zone.
- Using them to illuminate the ambient/kitchen will result in unnecessary power consumption and inadequate illumination.
- For your device to consume less energy, run it at a low speed level.
- Your device will reduce energy consumption as it will run more efficiently when you provide sufficient air intake to it.
- Set your device to the intense suction power level before the formation of steam, in cases where you know that the dense steam will occur. So, you reduce energy consumption by using your device for a shorter time as it will have a sufficient air intake.
- Keep the lids of the cookware closed to reduce the steam evolving.

3.3 Operating the hood

- Your appliance contains a motor that has various speeds.
- For better performance, we recommend using low speeds under normal conditions and high speeds in cases of strong odours and intense vapour.
- You can start your appliance by pressing on the desired speed setting button. (1, 2, 3)
- You may illuminate the cooking area by pressing the lamp.

3.4 Replacement of Lamp

- Before replacing the light bulbs, disconnect the power supply of the hood.
- Do not touch the light bulbs when they are hot.
- Be careful not to touch the replaced light bulb directly with hands.

You may procure lamps from Authorised Service Agents.

MAX: 2 W

Bulb	
Bulb Power	2 W
Holder / Socket	L14
Bulb Voltage	110 - 240 V

3 Using the appliance

Size	34.5*120 mm
Luminous flux	81 lm
Correlated colour temperature	4050 K

This product contains a light source of energy efficiency class "A".

3.5 Operation with chimney connection

Vapour is extracted through the flue duct, which is fastened to the connection head on the hood.

- The diameter of the flue duct must be the same as the connection ring. In horizontal settings, the pipe has to have a slight upward slope (around 10°) so that the air can exit the room easily.

3.6 Operation without chimney connection

Air is filtered through the carbon filter and recirculated in the room. Carbon filter is used when it is impossible to use a flue in the house.

- In flue less use, remove the flaps inside the flue adapter.
- Remove the aluminium grease filter. To install the carbon filter, fit the filter to the tabs by centring it on the plastic piece on both sides of the fan body. Tighten it by turning right or left.
- Replace aluminium grease filter.

4 Cleaning and maintenance

The device should be cleaned and maintained regularly. Failure to keep the device clean will adversely affect the service life of the device. For cleaning and maintenance, follow the instructions stated in the manual.

Before cleaning and maintenance, unplug the product or turn off the switch.

Non-compliance with the provisions associated with the cleaning of the device and replacement of the filters may result in a risk of fire. Therefore, it is recommended to follow the guidelines stated here. The manufacturer is not responsible for the engine damages or fires originating from the improper use.

Clean using only a cloth dampened with a neutral liquid detergent. Do not use abrasive products or alcohol.

4.1 Cleaning of grease filter

This filter captures particles in the air. You are recommended to clean your filter every month under normal usage conditions. First remove the grease filters for this process. Wash the filters with liquid detergent and rinse them with water and install them back after they get dry. Grease filters may get discolored as they are washed; this is normal and you don't need to change your filter.

- Push the grease filter lock forward.
- Then pull it slightly down and pull it out. Otherwise, you may bend the filter. Wash and rinse grease filter with liquid detergent and replace grease filter to their seats by carrying out the steps specified above in reverse order. These grease filter are used to retain the oil particles

in the air.

You may also wash the grease filter in the dishwasher.

CAUTION: In case of normal use, clean your grease filter once in a month.

4.2 Replacement of Carbon Filters

Odour removing filters contain charcoal (Active carbon). Grease filter must be installed in the product, regardless of whether or not carbon filters are used.

- Remove the grease filter.
- To remove the carbon filter, remove the carbon filter from its housing by rotating it counter-clockwise from the tab.
- Install the new carbon filter.
- Install the grease filter.

CAUTION:

- Carbon filter shall never be washed.
- Replace carbon filters once every 3 months.
- You can obtain the carbon filter from the authorized services.

5 Installation of appliance

WARNING: Before starting the installation, read the safety information on User Manual.

WARNING: Failure to install with screws and stabilizers in accordance with these instructions may result in electric shock.

For the installation of the hood, please contact the nearest Authorized Service.

It is the customer's responsibility to prepare the location and electrical installation of the hood.

5.1 Position of the appliance

- Distance between the cooker and the cooker hood must be considered prior to assembly. This distance should be 65 cm.
- Distance must be measured from the surface of grate for gas cookers, from surface of glass for electric cookers.

5.2 Installation accessories

1. Hood
2. User manual
3. Screws x6
4. Plastic dowel x6

5.3 Installation

Two methods for installation

Method A:

To install onto the wall drill 2 holes of $\varnothing 8\text{mm}$ on a suitable place according with the centre distance of hole in the back of the cooker hood.

Insert the nut into the holes.

Insert the screws into the nuts and tight.

Put the cooker hood onto the tighten screws.

Fix the cooker hood with safety screw.

The two safety vents are positioned on the back casing, with diameter of 6mm.

Put the one way valve onto the cooker hood.

5 Installation of appliance

Method B:

Drill 4 holes of 6mm diameter at the bottom of the hanging cupboard. Put the one way valve on the cooker hood, then install the cooker hood on the bottom of the hanging cupboard, tighten the hood with enclosed 4 screws.

- The extensible pipe are optional accessory, not supplied.
- Take off protection film before installation.

5.4 Air outlet installation method

Installation method for 150mm diameter pipe: Insert the one-way valve as the picture and fix the pipe.

ATTENTION: The bump of the one-way valve must be upward.

Installation method for 120mm diameter pipe: Insert the damper as the picture and fix the converter before placing the duct.

The pipe near the air outlet need to be fully extended.

5.5 Storage

- If you do not intend to use the appliance for a long time, please store it carefully.
- Please make sure that the appliance is unplugged, cooled down and totally dry.
- Store the appliance in a cool and dry place.
- Keep the appliance out of the reach of children

5.6 Handling and transportation

- During handling and transportation, carry the appliance in its original packaging. The packaging of the appliance protects it against physical damages.
- Do not place heavy loads on the appliance or the packaging. The appliance may be damaged.
- Dropping the appliance will render it non-operational or cause permanent damage.

6 Troubleshooting

Troubleshooting	Reason	Help
The product does not work.	Check your fuse.	Your fuse might be closed, make it work.
The product does not work.	Check the electrical connection.	The mains voltage should be between 220-240 V.
The product does not work.	Check the electrical connection.	Check if the other products in your kitchen are working or not.
The lighting lamp does not work.	Check the electrical connection.	The mains voltage should be between 220-240 V.
The lighting lamp does not work.	Check the lamp switch.	The lamp switch should be in the "on" position.
The lighting lamp does not work.	Check the lamps.	The lamps of the product should not be faulty.
The air intake of the product is poor.	Check the aluminum filter.	The aluminum oil filter should be cleaned at least once a month under normal conditions.
The air intake of the product is poor.	Check the air vent flue.	The air vent flue should be in the "on" position.
The air intake of the product is poor.	Check the carbon filter.	For products with carbon filters, the filter should normally be changed every 3 months.

Defy customer care call centre

If you have followed the instructions and still have a problem or have any service or spares queries, please contact the customer care line by sending an email to service@defy.co.za or by calling **0861 00 3339**. They will be able to advise you on any aspect of the appliance.

Warranty

This certificate is issued by DEFY APPLIANCES (PTY) LIMITED manufacturers of Defy and Ocean products, hereinafter the Company, to the original purchaser only, of the appliance described on the certificate and shall constitute the only warranty given in respect of this appliance.

The Company warrants to the original purchaser that for a period of TWO YEARS from date of purchase the appliance is free from defect under normal domestic use, both in workmanship and material, subject to the following conditions.

- 1.** Repair or replacement of any part of this appliance, found by the Company to be defective, shall be at the election of the Company. The Company reserves the right to effect such service through any of its Service Divisions or Authorised Service Dealers. The cost of such service shall be borne by the Company in full, provided that the appliance is located no further than 50km from a Company Service Centre or an Authorised Service Dealer. Where the appliance is located beyond the 50km radius, the purchaser shall be liable for the standard travelling charges, as determined by the Company.
- 2.** Vitreous enamelware, fuses and lamps are specifically excluded from these warranties. It is an express condition of these warranties that the purchaser takes due care and attention in the use and maintenance of the appliance. Abuse, misuse in conflict with operating instructions, connection to incorrect voltages and subjection to commercial use shall release the Company from its obligations.
- 3.** This warranty shall become void and cease to operate if the appliance is dismantled by, or any repairs to the appliance are effected by any persons not duly authorised by the Company, or if substitute parts not approved by the Company are used in the appliance, or if the serial number of the appliance is removed.
- 4.** The Company shall not be responsible for damages resulting from fire, flood, civil disturbances or any Act of God. The Company shall not, in terms of these warranties be responsible nor held liable for any consequential loss or damage of any kind caused by or due to the failure or malfunction of the appliance. The Company shall not be responsible for damages caused by insect and/or animal infestation.
- 5.** The Company shall not be responsible for transportation or other costs other than those incurred within the provisions of Point 1 of this Certificate.
- 6.** For warranties in the Republic of South Africa and Sub-Saharan Africa, please contact the customer care line. Please refer to the previous page for South African and Sub-Saharan African contact details.
- 7.** Where service is requested under warranty and no fault or defect can be found by the Company, all costs incurred will be for the purchaser's account.
- 8.** This Certificate as well as your invoice will serve as proof of purchase. For the purpose of warranty, it will be essential to produce this Certificate and invoice. Failure to do so, will render the purchaser liable for service costs.

KEEP THIS CERTIFICATE AND SALES INVOICE AS PROOF OF PURCHASE FOR WARRANTY PURPOSES.
